A Well-known Governmental Entity Replaces Its Legacy Infrastructure with KEMS Zajil Telecom Cloud Solutions

KEMS zajil Telecom
A Kalaam Group Company

Location: Kuwait | **Industry:** Government | **Cluster:** Cloud

Challenge
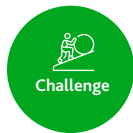

Upgrading Network Infrastructure in terms of Connectivity, Security, and Cloud.

The Organization was going through a transformational phase as it encountered numerous problems linked to network performance, mainly caused by the utilization of outdated network equipment. Multiple data loss incidents occurred because of a lack of security measures, coupled with the use of aging physical servers and storage infrastructure.

Solution

Modernized the infrastructure and improved network performance through the replacement of outdated equipment and the introduction of Cloud and Security solutions.

KEMS Zajil Telecom designed and delivered a tailor-made solution that solves customer challenges through the below key deliverables:

- Enhancements were made to connectivity and its related hardware.
- Services such as Virtual Private Servers (VPS), Backup Storage as a Service, and Disaster Recovery (DR) were implemented.
- The network and cloud infrastructure were safeguarded using cutting-edge technologies.
- Advanced voice solutions were implemented.

> "We required solutions that offered greater flexibility compared to our previous traditional network configuration. The advantages of this transformation went beyond cost reduction; we also observed improved productivity among our staff."
